**Joint projects,
joint successes**

Two focuses in this year's program

PKI Automatization

Business Wallet

Two focuses in this year's program

PKI Automation

Business Wallet

- Many PKIs still managed manually
- Certificate lifetimes become shorter
- Many certificates issued to AI agents

Two focuses in this year's program

PKI Automatization

Business Wallet

Lennart Prekel

Fewer tickets, stronger security: PKI modernization for KRITIS – and beyond

Ralf Vennemann

From standards to the power outlet: X.509 certificates and smart meter rollout in Germany

Two focuses in this year's program

PKI Automation

Business Wallet

PKI Automation
demo

Two focuses in this year's program

PKI Automatization

Business Wallet

- Secure digital identity solution for companies
- Purpose: manage and share business credentials

Two focuses in this year's program

PKI Automatization

Business Wallet

Kim Nguyen

Europe's business wallet as a strategic enabler for the single digital market

Tim Wilbrink

Digital identity at a crossroads: Why wallets need eID to deliver trust, scale, and sovereignty

Two focuses in this year's program

PKI Automatization

Business Wallet

Arno Fiedler
Trust Services with the EUDI Wallet

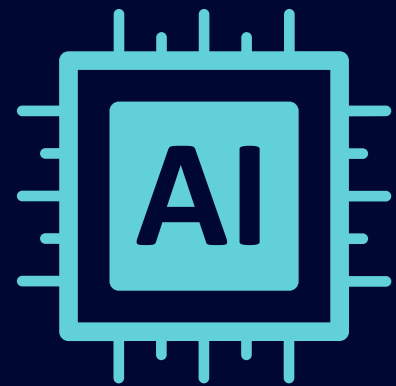

Digital Sovereignty

- Goal: individuals or organizations control their own identity data and decide with whom it is shared
- New regulations driving cyber resilience, supply-chain security, and data control

**Addressed in several talks
and demos**

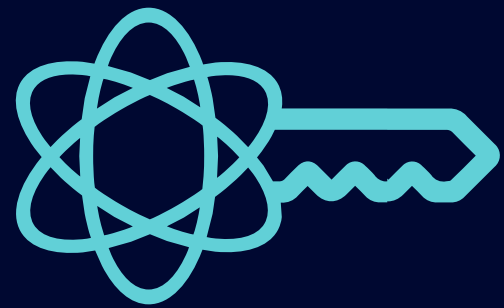

Artificial Intelligence

- Threat posed by AI is increasing
- Claude Mythos hit the news
- AI is also improving IT security
- Agentic AI security is growing
- Eviden has Agentic AI IAM solution

**Addressed in several talks
and demos**

Post-Quantum Crypto

- Digital-signature standardization has made progress
- Google has introduced 2029 timeline
- Quantum startup IQM
- EU PQC roadmap
- European regulations: NIS2 + EUCS

**Last year we talked about
it, this year you can see it**

Eviden Cybersecurity Products booth
